Summary

Results-driven data analytics professional with 3 years of experience across healthcare, retail, and operations, completed an M.S. in Business Intelligence & Analytics at Stevens Institute of Technology with a GPA of 3.8. Proven ability to transform raw, complex data into clear business insights that support strategic decision-making. Experienced in building end-to-end analytical solutions from data collection and modeling to visualization and stakeholder reporting across diverse industry environments. Adept at working cross-functionally, communicating findings to non-technical audiences, and delivering work that drives measurable outcomes. Actively seeking a data analyst or business intelligence role where analytical rigor meets real-world business impact.

Education

- | | |
|---|-------------------------|
| ➤ Stevens Institute Of Technology, New Jersey, USA
Master of Science- Business Intelligence and Analytics/ GPA- 3.8/4.0 | January 2025 – May 2026 |
| ➤ Chaitanya Deemed University, Warangal, India
Bachelor of Science – Artificial Intelligence / GPA- 3.4 | August 2018 – May 2021 |

Work Experience

Graduate Assistant

Stevens Institute of Technology, Hoboken, NJ

September 2025 - December 2025

- Developed and maintained SQL-based enterprise database solutions to ensure data accuracy, supporting various technology & infrastructure projects.
- Assisted faculty in designing and delivering data-driven coursework, including topics on data analytics, machine learning, and cloud platforms.
- Developed and maintained SQL and Python-based datasets to support research projects and classroom exercises, improving data availability by 30%.
- Automated data extraction and processing workflows, saving 15+ hours of manual effort per week.
- Collaborated with professors to design dashboards using Tableau and Power BI, visualizing academic trends and research findings for stakeholders.
- Mentored 9 students in building interactive dashboards using python libraries, enabling them to present data insights with measurable improvements in clarity

Data analytics Intern - AIBA Solutions

Hyderabad, Telangana, India

June 2024 – September 2024

- Designed and delivered 5+ interactive Power BI and Python dashboards to visualize IoT transaction performance metrics, improving real-time visibility for engineering teams
- Collaborated with 8+ engineers and data scientists to enhance data-driven project delivery strategies, reducing reporting turnaround time by 25%
- Automated ETL workflows and validated data pipelines, ensuring reliable data ingestion and saving 10+ hours of manual processing per week
- Supported project managers in task execution, scheduling, and documentation across 3+ concurrent projects, improving team coordination efficiency

Marketing & Analytics Intern - Naveena Children's Hospital

Hanamkonda, Telangana, India

October 2023 – May 2024

- Analyzed performance of 10+ marketing campaigns across digital, referral, and community outreach channels, identifying key drivers of patient acquisition
- Tracked and reported 8+ marketing KPIs including appointment conversions, OPD footfall growth, and campaign ROI, enabling data-driven budget decisions
- Built 3+ Excel and Power BI dashboards consolidating marketing and operational metrics, reducing manual reporting time by 35%
- Conducted demographic and behavioral analysis on 500+ patient records to support targeted paediatric service promotions, improving campaign relevance

Operations Manager – Family Owned Clinic & Pharmacy

Warangal, Telangana

June 2021 – November 2023

- Managed end-to-end operations of a healthcare clinic and retail pharmacy serving 100+ patients daily, overseeing staffing, inventory, and financial planning
- Streamlined inventory and supplier processes across 15+ vendors, reducing operational costs by 20% and minimizing stockouts

- Monitored sales, inventory, and patient data weekly to identify performance trends, supporting data-informed decisions that improved revenue consistency
- Maintained financial records and tracked P&L metrics monthly, contributing to a 15% improvement in overall operational efficiency

Technical Skills

- **Programming Languages:** Python, SQL (MySQL, PostgreSQL), R
- **Software & Tools:** Power BI, Tableau, Excel (Pivot Tables, Dashboards, VBA), Google Data Studio, Jupyter Notebook, Google Colab, Git, Microsoft Office Suite, Google Workspace
- **Analytical & Business Skills:** Data visualization, Business process optimization, Project management, Financial analysis, Operations management, Data-driven decision making, Reporting & KPI tracking
- **Data Management & Analytics:** Database querying, ETL processes, Data cleaning and transformation, Statistical analysis, Predictive modelling, Performance analysis
- **Certifications:** SQL, Python, Power BI, Data Analytics, Cybersecurity Fundamentals

Project Experiences

Cardinal Health Business Intelligence Dashboard

October 2025 – October 2025

- Developed Power BI dashboards visualizing KPIs for logistics, sales, and inventory performance.
- Built a relational data model and automated data refresh pipelines to reduce manual reporting time by 40%.
- Tools Used: Power BI, Excel, SQL

Hospital Readmission Prediction

April 2026 - May 2026

- Developed a Random Forest classifier on 97,000+ diabetic patient encounters to predict 30-day hospital readmission risk, achieving ROC-AUC of 0.665
- Engineered 22 clinical features from 50 variables including medications, lab results, prior visits, and discharge disposition
- Applied class-weight balancing to handle 11.5% minority class, optimizing recall to maximize detection of high-risk patients

Supply Chain Demand Forecasting

April 2026 – May 2026

- Built a Gradient Boosting time-series forecasting model on 913K daily sales records across 10 stores and 50 products, achieving SMAPE of 12.14%
- Engineered 21 features including lag variables (7/30/365-day), rolling statistics, and sin/cos cyclical encodings to capture weekly and seasonal demand patterns
- Validated model on a full unseen year (2017), achieving MAE of 6.14 units per store-item per day

SentinelAI — Misinformation Risk Detection Platform

March 2026 – May 2026

- Architected a production-grade SaaS platform for real-time misinformation risk scoring using FastAPI, React, and Supabase with JWT multi-tenant authentication
- Trained a Random Forest classifier on 7 behavioral and linguistic features achieving AUC-ROC of 0.9994 on a balanced synthetic dataset, with sub-25ms scoring latency
- Implemented batch scoring (500 posts), CSV upload, moderation queue, human review workflow, webhooks, and AI-powered explanations via Anthropic API

Certifications

- **Google Data Analytics Professional Certificate** – Coursera
- **Intermediate SQL** – DataCamp
- **Power BI Fundamentals** – DataCamp
- **Python for Data Science** – DataCamp
- **Cybersecurity Fundamentals** – Stevens Institute of Technology
- **Excel for Business and Data Analysis** – DataCamp
- **Business Process Re-engineering (BPR) Project Certification** – Stevens Institute of Technology

Extracurricular Activities

- Member – Business Intelligence & Analytics (BI&A) Club – Stevens institute of technology
 - Volunteer – Campus Analytics Helpdesk, Stevens Institute of Technology
-
